My Projects:

Loudrop Store:

An Ecommerce application with different features as cart, checkout, authentication with google, dark mode and responsive design.

[Link to deploy.](#)

Countries App:

An app where you can search for all the countries, create tourism activities and associate them with the different countries.

[Link to deploy.](#)

Majorkey Careers Rebrand:

An application where I rebranded a page of the majorkey website, where I preserved the existing functionalities and added new ones such as pagination and card detail.
